

QUATREFOIL LAP ROBE

45" x 45"

This lab robe is made with 5-inch squares (finish at 4.5") in 6 rows with 6 squares in each row and three borders.

36 total squares:

- 16 5-inch squares
- 8 HST
- 12 background 5" squares

The first border must finish at half the finished size of the squares or 2.25" (cut 2.75") in order for the second border sides, top and bottom to match.

If using the squares border, the sides have 7 5-inch squares and the top and bottom have 9 5-inch squares, for a total of 32 5" squares in the border.

The third border was made the same size as the first border, but it can be any size.

Of course, regular borders can also be used.
